PERSONAL FEEDBACK

Preparation process before the exchange

The preparation was really easy as there was already a partnership. It was easy to apply and the people from Bern and from Victoria helped wherever I needed help.

Teaching range and quality at host institution

The possibilities you have at Camosun College are big. There are so many different classes. Unfortunately the quality isn't as high as in Switzerland, but that gives you the great chance to explore the city, the country and spend time with new friends.

Accommodation in the host city

I lived in a Homestay, with a Canadian family. They were extremely nice and it's and easy way to connect to Canadians (also because of the children, when they're in your age). It was also always clean and the food was just delicious.

Life and leisure

Canadians are very friendly and invite you to do things outside of school which is always nice. Furthermore you'll meet a lot of other international students and you can explore close cities or others with them. An exchange semester is actually very busy and you always have plans to see somebody or something.

Hints and suggestions for future students

Try to connect as fast as possible to local students as they will help you to organize your life. If you're in from the beginning they'll like you! Ask students who have been there before from your school! Victoria in Canada was the best choice ever and I really enjoyed it. I passed all my classes and still had enough time to go on weekend-trips, parties and to do other stuff. I've made some pretty good friends and will always found a second home in Victoria.

Conclusion

Victoria in Canada was the best choice ever and I really enjoyed it. I passed all my classes and still had enough time to go on weekend-trips, parties and to do other stuff. I've made some pretty good friends and will always found a second home in Victoria.
